

Sean Kelly was the recipient of the 2013 Harold Zeh Award while at the University of Portland. He graduated *maxima cum laude* in 2014 with a BS in Chemistry. While at the University of Portland he worked with Dr. Angela Hoffman on natural product research.

After graduating, Sean started his doctoral work in biomedical engineering at the University of Chicago, joining the research group of Dr. Joel Collier. He moved with Dr. Collier to Duke University in 2016. His thesis research investigates the interactions of nanomaterials with the mucosal immune system, with particular interest in the design of sublingually-delivered vaccines.

Sean was a recipient of the National Science Foundation's Graduate Research Fellowship in 2016.
